SureStep Data Solutions

SureStep has spent years developing and delivering value-add modules and custom enhancements to our partners' platforms.

Extract-Transform-Load

New ETL workflows often takes months to initiate, design, and get approved within a business. With SureStep's fully customizable ETL-as-a-Service, we give you the ability to be up and running in just days.

Master Data Management

MDM initiatives normally take years to mature and return value. SureStep's expertise and customized engagements, our customers can significantly improve their ROI's.

About

Since 2007, SureStep has specialized in GRC and its associated disciplines. Since then, client demand has fuelled growth into new markets in terms of solution offerings and a global presence.

Our current practice offers consulting and turnkey solutions in the following areas:

-  Data models/glossary, data risk and compliance, data quality and integration
-  Governance, risk and compliance as well as financial risk systems
-  Analytics
-  Cloud infrastructure and application management

SureStep is one of IBM's largest global Risk Analytics partners and the only one providing hosting and managed services. Dozens of Fortune 1000 companies trust the running of their applications to SureStep in IBM Cloud, AWS and Azure as well as private and hybrid environments.

Governance-as-a-Service

Data governance is never an easy undertaking. With issues around adoptions, accountability, and maintenance, most governance initiatives, while extremely valuable, often fail to gain traction or grow stale.

SureStep treats governance as much of a cultural initiative as a technological one. SureStep's extensive experience in working with and supporting governance initiatives has given us a strong set of methods for success. SureStep helps offer:

-  Initiative consulting and management
-  Governance tool accelerators
-  Training
-  Platform hosting and administration
-  Governance platform migration and consolidation

SureStep is committed to enabling your business to succeed and provides the necessary tool and resources. We are constantly developing our custom services to keep in-line with all major market vendors to make sure we can support your initiatives regardless of the platform.

Data Enrichment

SureStep's strategic partnerships gives us the ability to offer enrichment services to improve various data sets within your organization. Our enrichment services improve reporting accuracy, data usability, and value derived from the data.

Business Glossary Accelerators

A Business Glossary is one of the fundamental parts of every governance initiative. SureStep offers every customer the ability to sidestep much of the initial workload that too often kill a glossary before it really gets off the ground.

Flexible Licensing

All SureStep offerings allow for flexible requirements, customizations, and payment structures. Every solution is tailored to the customer's specific requirements.

Address Certification

SureStep offers certification capability to help reduce your business's costs for bulk mailing while also guaranteeing delivery.

Getting a Handle on your data

Every business is built on data and the corporate requirements surrounding it. Whether it be address data, reference data, or personally identifiable information, raw data can require a lot of time and expertise to derive value.

SureStep recognizes these needs and offers comprehensive means to help maintain, cleanse, and report of your current or legacy data.

SureStep also provides straightforward and customized methods for improving your corporate data strategies regardless of the data type or format:

- Data cleansing as a Service
- Address and Geo-Spatial Enrichment
- Address Verification and Certification
- Custom ETL as a Service
- Data Compliance services
- Data Center consolidation
- Business Glossary term and asset development

Partners

SureStep is constantly reviewing the market leaders, their technology and investment roadmaps to ensure it provides only the best options to our customers. Our partners are the best in the world at what they do and we're proud to work with them.
