## SureStep Solutions

SureStep has spent years developing and delivering value-add modules and custom enhancements to our partners' platforms.

## Hosting & Security

SureStep's strong risk background means we know that security is a large factor in cloud based solutions. We actively work with client compliance and security teams to make sure that any environment or solution we provide meets your own custom requirements.

## Affordability

SureStep offers financing options for all of our customers including multi-year and zero percent options to help every customer meet their internal financial requirements.

# About

Since 2007, SureStep has specialized in GRC and its associated disciplines. Since then, client demand has fuelled growth into new markets in terms of solution offerings and a global presence.

Our current practice offers consulting and turnkey solutions in the following areas:

- Data models/glossary, data risk and compliance, data quality and integration
- Governance, risk and compliance as well as financial risk systems
- Analytics
- Cloud infrastructure and application management

SureStep is one of IBM's largest global Risk Analytics partners and the only one providing hosting and managed services. Dozens of Fortune 1000 companies trust the running of their applications to SureStep in IBM Cloud, AWS and Azure as well as private and hybrid environments.

# Hosting & Infrastructure

SureStep currently provides hosting and managed services on all industry leading cloud platforms and includes:

- IBM Cloud
- AWS
- Microsoft Azure
- Options IT
- Google Cloud

SureStep offers fully managed offerings for:

- Private Clouds
- Hybrid Clouds
- IBM Cloud Private
- Cloud Disaster Recovery and High Availability

SureStep also supports custom security requirements as well as regulatory change management. We also support customizable plans for usage, virtualization requirements, and co-location.
